BACKLIGHTING

CAMBRIA DESIGNS THAT CAN BE BACKLIT

1. Cambria has successfully utilized 2 backlighting options for stone products:
 - 1.1. Tresco LED snap panels (Vertical and 2cm Horizontal applications) (Approved Statement Tresco Panels)
 - 1.2. ThinLight LED backlighting panels (Vertical and Horizontal applications) (Approved Statement ThinLight panels)
2. Thickness of the material is a critical consideration. Cambria recommends 6mm material for most backlighting applications. Exceptions to this are 3 Cambria designs that are specifically created to be backlit with thicker stone. These designs are:
 - 2.1. Baybridge™ (2cm max.) can be backlit between 6mm and 2cm for either Tresco or Thinlight.
 - 2.2. Myddleton™ (2cm max.) can be backlit between 6mm and 2cm for either Tresco or Thinlight.
 - 2.3. New Brighton™ (1cm max.) can be backlit between 6mm and 1cm for either Tresco or Thinlight.
3. Multiple Cambria designs can be properly backlit at a thickness of 6mm. Cambria's standard backlighting surface illuminance is 200 LUX for an office setting and 50 LUX for a dimly lit setting such as a study or parlor.
 - 3.1. The following table defines Cambria designs that can be successfully backlit within an office setting (200+ LUX):

Design	Tresco Snap Panel	ThinLight LED Panel
Baybridge™	Yes	Yes
Brittanicca Gold™	Yes	Yes
